## 1. Introduction

Delhi Pharmaceutical Sciences and Research University (DPSRU) is the first Pharmacy University in India and third in the world, established by Act 07 of 2008 State legislature of Delhi and functional from 2015. It is 100% grant-in-aid State Government University recognized under 2f and Section 22 of the UGC. It has the campus spread over an area of 10.36 acres. With the comprehensive, multidisciplinary pedagogy of learning and research having holistic approach in pharmaceutical and allied health sciences students are being most benefitted in terms of campus placements and to excel in the competitive world.

Delhi Pharmaceutical Sciences and Research University (DPSRU) is a quality conscious university, protecting its environment with maintaining a green and pollution free campus. Environment development is its basic work with the educational policies implemented in the campus. The management and the students of DPSRU look after the environment carefully. We do tree plantation every year and carefully look after it. It's our own responsibility to preserve the work done in the campus related to the environment. We have formulated our own environment and energy utilization policy. DPSRU aims to cultivate the spirit of embracing internationalism, diversity and competitiveness amongst students, such that novel and creative ideas are harnessed, leading to unique discoveries and inventions for the advantage of society at large.

The institution displays sensitivity to issues like climate change and other environmental challenges. It adopts environment friendly practices and takes necessary actions such as – energy conservation, rain water harvesting, waste recycling, carbon neutral etc. The institute has successfully adopted a well-developed environment and energy utilization system for greater efficiency and sustainability.

## 2. Objectives of environment and energy utilization policy

1. To create awareness regarding environmental policy of our university to our students and the staff.
2. To sensitize the students and staff regarding the use of drinking water properly for which, we have provided aqua-guarded drinking water facilities in the campus.
3. To maintain pollution free campus by avoiding tobacco, pan-masala etc. chewing in the campus. As per the govt. rules and regulations, the instructions are displayed in the campus.
4. To bring into use the 'Rain Water Harvesting' in the campus.
5. To Use Solar Energy in Campus we have Solar panels on rooftop of the building.
6. To increase awareness in youth and for their safety we do not permit two wheelers drivers to enter in DPSRU campus without helmet.
7. To avoid noise pollution we do not allow bullet vehicle in university campus.
8. To use 'No Vehicle Day' concept once a month to keep the campus vehicle free. It helps to save the fuel and make the people use their own natural means.
9. To use the ICT and use minimum paper. It will help to go towards 'Paperless Office'.
10. To use the garbage for recycling it and use it in place of the chemical fertilizers.
11. To use 'Use me' dust bin in the university campus so as to keep university campus clean.
12. To maintain green campus, we are doing 'Green Audit' of our university.

### 3. Constitution of Green Audit Committee

An internal proactive and enlightened Green Audit Committee is constituted in Delhi Pharmaceutical Sciences and Research University for regular monitoring of the greenness and cleanliness of the University campus. The committee comprises of faculty and students who work hand in hand to take care of the University campus.

The Green Audit Committee will act as per the environmental policy and will have the responsibility of maintaining and protecting environment surrounding the university. The aim of the committee is to provide advice for the development of environmental policy and practice in the areas of:

1. Waste Management
2. Soil Management
3. Bio-medical waste management
4. Biodiversity and threatened species preservation
5. Energy use and conservation
6. Eco-friendly techniques
7. Noise Pollution
8. Air Pollution
9. Paper less operating procedure
10. Green environment and clean campus

## 5. Energy conservation Practices in DPSRU

Following are the key steps performed for environment and energy management:

**Sensor-based energy conservation:** DPSRU University is using the equipment which are saving energy. Also purchasing the instruments with 4 star to 5 star power consumption and saving the electricity. In classrooms and washrooms sensors have been installed to prevent the wastage of electricity. Measures are also undertaken to conserve energy and utilize alternate source of energy. The campus has a solar lighting system.

### Use of Renewable Energy

#### *Solar energy*

Solar energy is produced by the sun's light - photovoltaic energy offers many benefits that make it one of the most promising energy

- i. Renewable
- ii. Inexhaustible,
- iii. Non- polluting,
- iv. Avoids global warming,
- v. Reduces use of fossil fuels,
- vi. Reduces energy imports,
- vii. Contributes to sustainable development.

The Ministry of New and Renewable Energy (MNRE), Govt. of India has been promoting the aim to develop and deploy New and Renewable energy for supplementing the energy requirement of the country. The rooftop solar PV power plant of have been installed on the rooftops of various buildings.

( सैनिकफार्मगेटनंबर-1, एम.बी. रोड, पुष्पविहार, सेक्टर-III, नईदिल्ली-110017 )

### *Sensor-based energy conservation*

- DPSRU believes in reducing the wastage of energy. We believe in the slogan, “Energy saved is energy generated”. In this direction, our university has installed sensors in the classrooms, washrooms, etc. to minimize the wastage of energy.
- Measures are also undertaken to conserve energy and utilize alternate source of energy.

### *Wheeling to the grid*

The energy output of the solar panels are utilized for the power requirements for the university and the power output of the solar panel are also connected to the power grid.

Co-ordinator, IQAC

( सैनिकफार्मगेटनंबर-1, एम.बी. रोड, पुष्पविहार, सेक्टर-III, नईदिल्ली-110017 )

the excess power produced by the solar panels are supplied to the grid for the power consumption of the university.

#### *Power efficient appliances*

- DPSRU University is using the equipment which are saving energy.
- The instruments with 4 star to 5 star power consumption are purchased to save the electricity.
- University has UPS devices at different places

#### *Use of LED bulbs*

- Constructions are well ventilated and lighted with minimal need of artificial lighting.
- Still the institution has installed CFLs and LED'S, this has helped a lot in conservation of electricity.

#### *Other Measures*

University has following practices to conserve energy by electronic equipments means:

- By Seeking out computing related equipment and services have the lowest footprint possible.
- Ensuring that all computers have activated power management software to minimize energy consumption and put the computer in sleepy mode when not in use. Always turn off monitors.
- Adopt guidelines for extending the life of computers and components (i.e. follow manufacturers guidelines) and maximize (i.e. re-use, repair, recycle).
- Minimising the paper work and wastages go through eco-friendly recycle process.
- Use electronic method for the information / circulation/ notices etc. (thus minimizing paper use).
- University employees go for policy of re-use, repair, recycle wherever possible in there working.

( सैनिकफार्मगेटनंबर-1, एम.बी. रोड, पुष्पविहार, सेक्टर-III, नईदिल्ली-110017 )

- The buildings have been designed specifically on prescribed parameters of energy efficiency and environmentally benign technologies.

Following aspects in particular need special mention: -

1. All the buildings have been so designed that there is proper natural day light, thus minimizing the use of artificial lights during the day.
2. The buildings have been so designed that they remain relatively cool during summers and warm during winter even without air-conditioners, thus there is a positive environmental impact. It reduces temperature swing also.
3. All the buildings have proper air ventilation, proper aesthetic appearance, well maintained neat and clean structures and infrastructure.
4. All the buildings use greenery and are surrounded by sufficient number of trees so that there is overall positive environmental impacts.
5. The drainage system of the buildings enables water-reuse in promoting greenery in the campus.

## 6. Air Pollution Management

The university strives constantly to minimize the movement and pollution arising due to fuel driven vehicles within the campus. Many students and staff prefer walking within the campus as the same is quite compact. The noise levels in the campus are kept to the minimum by minimal movement of automobiles within the campus.

- A. "No Vehicle Day" and Restricted entry of vehicles: To avoid the air pollution, we decide to work on no vehicle day once in month. The vehicles are not allowed in the campus but they are parked in the parking area, reasonably away from university. Every staff member and students must follow this rule and get participation in this event. All the vehicles of university staff/ faculty members are expected to possess emission

certification and it is frequently checked before entering the university campus. The university encourages the employees and students to use public transport, bicycles. etc. to limit the emissions thereby helping in reducing pollution and consumption of fuels.

#### **B. Compulsory pollution check-up of 2W/4W**

For air pollution due to vehicle, we also collect PUC certificate from all staff members. We also arrange lectures on it for creating awareness among staff and students.

#### **C. Display boards in university campus**

Various boards for the awareness on the environment control, noise control, tobacco free campus, conservation of energy, recycling of resources, tree plantation and environmental policy of university are displayed for all the stakeholders.

### Pedestrian-friendly pathways

#### Ban on use of plastic

In order to ensure a plastic free environment, the University has conducted many programmes from time to time to encourage the staff & students to avoid the plastic use and issuing orders/circular from time to time. Our university is committed to make the campus plastic-free zone. Therefore, there is a complete ban on single-use plastics in class room, labs, canteens in the institution's premises and hostels. Awareness activities are conducted to promote reduced use of plastic inside and outside the campus.

#### 'No Smoking, No Tobacco' in campus area

DPSRU is completely smoking and tobacco free campus and use of these are a punishable offence. The instructions regarding this are already given to the students and the staff members. The display boards are displayed at various places in the campus. In reference to this subject we created various eye opening posters and slogans through our green audit committee.

### **Eco-ventilators/Exhaust fans in Laboratory and Library**

All the laboratories and library are having good ventilation and exhaust fans.

### **Efforts for Carbon Neutrality**

The following steps have been taken:

1. A Large number of plants of various species and varieties have been planted in the campus during the last five years.

2. Many varieties of various kinds of herbs have been planted in Herbal Garden.
3. Different types of decorative/ornamental plants, bushes, shrubs, etc. have been planted in the surroundings of office buildings, residences, Library, Hostels, etc.
4. Survival rate of the plants in the University campus is more than 90%.
5. The campus has been declared as a "No Smoking Zone".
6. Burning of litter and other waste material has been banned.
7. Recycling of used paper is promoted.
8. Electronic methods are used to link / convey / transfer the information.

### Plantation

The university has massive plants and trees on the campus and is a green campus in reality. Sufficient money is spent to keep the environment green. The university arranges plantation program to create awareness about environment and reduce the problem of Global Warming.

### Landscaping with trees and plants

As per green practices, our campus moves in the direction of a green institution by planting more trees within and outside the campus and creating awareness with stakeholders by spreading the concept of eco friendly culture to the nearby community and wherever possible. Plants are also maintained in pots in various building at different floors. A small nursery is also maintained in the University for Regular Replacement of plants from time to time.

## 8. Medicinal Herbal Garden

The medicinal herbal garden within the campus has important traditional, medicinal and aromatic plants, herbs, shrubs and trees. The herbal garden is not only used by M. Pharm. and Ph. D. students working on herbal projects for growing plants for use in their experiments and collection but it also facilitates the conservation of rare medicinal plants. Herbs are cultivated according to their season to get maximum yield of useful component of herbal drug. This helps in obtaining constant and good quality of active principles. It also helps in training PG students about collection, cultivation and conservation of natural products.

( सैनिकफार्मगेटनंबर-1, एम.बी. रोड, पुष्पविहार, सेक्टर-III, नईदिल्ली-110017 )

<i>Rauwolfia serpentina</i>	Roots and leaves	used to treat high blood pressure (hypertension). High blood pressure adds to the workload of the heart and arteries.	
<i>Adhatodav asica</i>	Root, leaves, flowers, stem, bar	bronchitis, leprosy, blood disorders, heart troubles, thirst, asthma, fever, vomiting, loss of memory, 20eukoderma, jaundice, tumors, mouth troubles, sore-eye, fever, and gonorrhoea	
<i>Withaniaso mnifera</i>	Whole plant	Used in treating a wide variety of illnesses including asthma, diabetes, hypertension, stress, arthritic diseases, and cancer	
<i>Murrayako enigii</i>	Leaves	Used in treating piles, inflammation, itching, fresh cuts, dysentery, bruises, and edema. The roots are purgative to some extent. They are stimulating and used for common body aches	
<i>Lawsoniai nermis</i>	Leaves, bark, Seed, roots, Stem bark	antibacterial, antifungal, antiparasitic, antiviral, anticancer, antidiabetic, tuberculostatic, anti-inflammatory, antifertility and wound healing properties	
<i>Punica granatum</i>	Flowers, leaves, bark of young shoots and roots, fruit peel, and pomegranate sauce	The fruit and bark of pomegranate are used against intestinal parasites, dysentery, and diarrhea. The juice and seeds are considered a tonic for throat and heart. It is used to stop nose and gum bleeds and treating hemorrhoids	
<i>Vinca rosea</i>	Roots, shoot	used to treat diabetes, high blood pressure and have been used as disinfectants and anti-cancer. The vinca alkaloids have cytotoxic effects that can arrest the division of cells and causes cell death	
<i>Jatropapan durifolia</i>	leaves	antimicrobial, anti-cancer and anti-HIV activity has been well recognized

## 9. Noise Pollution Management

### Silence zones in University like library, auditorium

Various display boards are present in library, in OPD area, auditorium and other places for awareness to maintain silence in the campus.

### Noise control during any program in University

The university has one huge gate for the entry and exit of students, monitored by the security guard. The security guard and other staffs ensure smooth entry and exit of students without any noise and nuisance under Discipline Committee. On the occasion of Gathering, we form committee, which works for maintaining silence zones. We have display boards for awareness of noise pollution everywhere.

#### Controlling discipline and smooth entry and exit of student and staff

We have the entry register for the people coming to our university who are not the students of the university. Most of the times, the parents visit the university, they register their names at the gate and then they are allowed to enter the university. We have small room for parents outside the hostel, so as to control discipline. The security guard looks after the safety of the university campus.

#### No pressure horns for vehicle

Our university staff members and students does not use pressure horns and is not permissible for the students studying in the university.

## 10. Water Resources and other management of other sources of pollution

Our university has a well established rain water recycling system to harvest rain water in order to resolve and manage water scarcity problems that may arise in the future. Our maintenance staff regularly inspects tap leakages and attends to repair needs immediately to avoid loss of potable water. Students are made aware and sensitized through various programs regularly in this direction.

### Environmental Consciousness

Programmes for environmental protection and sensitization among students and members of the faculty are organized in the form of seminars / conferences / workshops /extension lectures, etc. Important days concerned with the environment like World Earth Day and World Environment Day are celebrated. The University is eco-friendly. Every effort is made to make the University an environment friendly institution. Formal as well informal evaluations are carried out by the University and student groups to monitor the impact of the University towards environment. The students have formed their community clubs which take care of the various environmental issues to promote greenery, monitor environmental impacts and generate awareness on environmental issues. The institution has given the proposal to the management to conduct green audit.

### Documentaries for Social Change

In collaboration, the students' community clubs regularly organize display of impact making documentaries. Most of these documentaries pertain to environment, energy conservation, social change etc. These documentaries are further discussed by student groups, and their impact is evaluated and the recommendations are forwarded to the concerned developers, who are in close touch with the community clubs.

## Awareness and sensitization in Environmental Science Class

Apart from regular teaching and learning, the students are also made aware regarding the environmental issues in the environmental science classes.

### 11. Waste Management

DPSRU being an educational institution, the key operations do not significantly impact the environment. University is very conscious of generating less waste and recycling it by passing it through a system that enables the substance to be reused, which ensures lesser consumption. The less waste we produce, the less we have to dispose. DPSRU believes in the principle of 3R's: Reduce, Reuse and Recycle. The major waste produced at university is as follow:

- (a) Solid Waste
- (b) Liquid Waste
- (c) Power sector/Lab Waste
- (d) Biological waste

Following are the key steps performed for waste management:

#### Solid Waste Management

Different garbage collecting bins have been placed at various locations for solid waste management. Waste disposal is done on a daily basis. It is also ensured that all of these components are recycled at lowest possible cost and with least amount of effort. Waste management in the university campus is handled by Municipal Corporation of Delhi. Dustbins are placed at different places to collect dry waste and wet waste. The waste is generated by all sorts of routine activities carried out in the university. It includes paper, glass, metals, foods,

( सैनिकफार्मगेटनंबर-1, एम.बी. रोड, पुष्पविहार, सेक्टर-III, नईदिल्ली-110017 )

etc. The waste is segregated at each level and source. There is a provision of separate dustbins for waste segregation at the source level - blue and green dustbins meant respectively for non-biodegradable and biodegradable waste. Biodegradable waste management is being practiced by way of vermi-composting which is later used as compost or organic manure for enriching the nutrient quality of the soil thereby substituting the chemical fertilizers. The non-biodegradable waste depending upon their nature they are sent for recycling. There is also minimal usage of pesticides for plant protection, wherever possible the natural eco-friendly alternatives are being used.

The administrative supervisor ensures that the waste in each floor is collected at designated time intervals. The block housekeeping staff in each floor collects the waste in the dustbins provided at each floor. The floor dustbins are emptied in movable containers/dustbins provided for each block and is taken by housekeeping staff from MCD. A proper procedure is followed for segregation of dry and wet waste at source itself followed by collection and disposal, without compromising sanitation and hygiene. Paper wastes from Academic Blocks, Library, Examination Centre, Administrative offices; Student's & Faculty Housing are properly collected and stacked in designated place from where they are collected for proper waste management. Old practical files and used notebooks are collected by student clubs for recycling purpose. Apart from having a very efficient mechanism for disposing of paper wastes, University consciously promotes reduction in usage of paper by using digital platform for communication and sharing of documents.

### Liquid Waste Management

Liquid waste is generated from different sources like Hostel Blocks, Academic Blocks, Faculty Housing, Canteen, Cafeterias and Laundry. Liquid wastes generated by the University are of three types:

1. Sewage waste
2. Laboratory, Laundry and Cafeteria effluent
3. Power sector used oil

Liquid waste is also handled by Municipal Corporation of Delhi. Biological waste from animal house is managed by vendor.

### E-waste Management

Efforts to reuse and recycle the e-waste safely wherever possible is practiced.

### Hazardous chemicals waste management

The faculties use very less corrosive chemicals for carrying out practical classes. Disposal to drains is done in dilute form and is kept in minimum practical. Chemicals are purchased in minimum quantity to save expiry and disposal. Campus is free of hazardous chemicals and radioactive waste.

## 12. Human Health and Safety Management

Health is wealth, is understood by our students and staff. Our university campus provides the facilities of indoor and outdoor stadium for the students, as well as staff. Our sports faculty provides proper guidance and we are motivated to do the daily exercise of Yoga / Meditation in the university. Yoga and meditation is a part of curriculum in few courses as well. Yoga teacher has been appointed by university for students. Yoga class is daily arranged for students. University also celebrates World Yoga Day on 21 June of each year. Yoga day is celebrated to create awareness amongst the staff members and students regarding the health benefits of practicing yoga in our day to day life. Our instructor and yoga teacher regularly conduct both online and offline programmes in this direction.

### 13. Reports of Events promoting Green and Clean Campus in DPSRU

DPSRU takes regular initiatives through various programs to maintain cleanliness of the campus.

#### **Earth Day Campaign organized by Delhi Pharmaceutical Sciences and Research University (DPSRU), New Delhi**

Earth Day campaign was organized on 22th April, 2022 at Delhi Pharmaceutical Sciences and Research University [DPSRU]. A campaign drive was organized on the theme “Phasing out Single use Plastic” to make everyone aware and accountable towards the environmental protection and to prevent the usage of plastics in their daily routine lifestyle. The campaign began with welcoming and addressing the guests and high dignitaries, followed by an interactive awareness programme for the students and the faculty members to make them aware about the healthy and sustainable livelihood with prevention of natural resources and energies, The program was followed by the planting saplings activity in the presence of Dr P.K Sahoo (Director, DIPSAR) , Dr.RajivTonk (Dean student welfare), Dr. Abhishek Dadhich ( Programme Coordinator; Earth Day), Dr. Prabodh Sharma (NSS Programme Coordinator) and Dr. Sahil Kumar (NSS Programme Officer). Healthy breakfast (sprouts salad) was also, distributed among the students and the faculty members. Many other professors graced the occasion with their valuable and prestigious presence and also addressed the students with their ideologies and thoughts and also enlightened them with their knowledgeable words. Students and faculty members volunteered to participate in the task of generosity by keeping bird feeder and water on the rooftops and near the DPSRU building. Parallely other enthralling competition like Rangoli competition, Painting competition [The Nature Landscape] and Art-Craft competition [Best out of waste] were organized for the students of the institution, along with that "No car day" was observed in the premises of DPSRU. The winners of the respective

## Unnat Bharat Abhiyan, National Service Scheme &

### DPSRU Campus Residents are Organizing

### SWACHHATA PAKHWADA with DUS KA DUM

"SWACHHATA PAKHWADA" as a part of "Swachhta Abhiyan" was initiated, with the objective of bringing a fortnight of intense focus on the issues and practices of Swachhata-meaning Cleanliness. To support this great initiative of GoI and GNCTD to create an awareness about the need of cleanliness.

To mark the ambitious mission of UBA, Clean India, Green India under the National SERVICE Scheme, Swachh Bharat, Shresth Bharat, the students, faculties and staff of Delhi Pharmaceutical Sciences and Research University had organized many events during the Observation of SwachhataPakhwada andDus Ka Dum In the theme of

CLEANLINESS FOR PREVENTION OF COMMUNICABLE DISEASES from 1st October 2021 to 31st October 2021.

"Cleanliness Drive in DPSRU" was organized by Unnat Bharat Abhiyan, National Service Scheme under the UBA & NSS Activities on 02nd October 2021. The entire activity happened under the supervision of Hon. Vice Chanchellor Prof Ramesh K Goyal inaugurated the program by commencing the Swachh oath ceremony. The event was successfully coordinated by the UBA Coordinator Dr. J Swaminathan, and Dr Vijendar NSS Programme Officer and other staff members. The event was effectively executed by the Registrar Dr OP Shukla and the other members.

The main purpose of this Programme was to create awareness among our students about the need and importance of clean environment. Even the Teaching & Non-Teaching Staff were the essential part of this cleanliness drive. The students were divided into 8 different groups and were sent to various locations to make sure that no part of the campus was left unclean and unnoticed.

Nearly 100 members and 20 Faculty coordinators participated in this drive. They all gathered near the main gate of DPSRU by 10.00 AM and the cleanliness drive was set into motion

DELHI PHARMACEUTICAL SCIENCES & RESEARCH UNIVERSITY  
( दिल्लीसरकार, Govt. of N.C.T. of Delhi )  
( Opp.Sainik Farm Gate No.-1, M.B. Road, PushpVihar, Sector-III, New Delhi-110017 )  
( सैनिकफार्मगेटनंबर-1, एम.बी. रोड, पुष्पविहार, सेक्टर-III, नईदिल्ली-110017 )

were shared by them as the University declared the event. It was then converted into a common video and was shared on several social platforms. The students of Fitoor also enacted a simple but impactful and impressive story to make each one aware of the collective and transformative action required to save, celebrate, protect and restore our planet. Sumaiya and Deepshikha from Fitoor coordinated the event. The video sends a highly impressive message supporting the 2022 World Environment Day campaign #OnlyOneEarth. It is a privilege to watch the video on DPSRU official website and YouTube Channel [https://youtu.be/1DTuCbO1A\\_E](https://youtu.be/1DTuCbO1A_E)

## SWACH AND SWASTHA ABHIYAN 8th Sept. 2019

“Dus Ka Dum” (10 Sunday; 10 Hrs; 10 Min. with 10 Staff Members) was launched. It is well said 'Every drop makes an Ocean'. As the Prof. Ramesh K. Goyal, Vice Chancellor, Delhi Pharmaceutical Sciences and Research University (DPSRU University), feels that every drop has its own significance and add value for making India 'Swachh and Swastha'. Delhi Chief Minister, Mr. Arvind Kejriwal Ji launched an awareness campaign for the prevention of Dengue and Chikungunya. To make effective this campaign, and put forward the combined efforts with DPSRU University team, Honourable VC Prof. Ramesh K. Goyal takes initiatives by checking DPSRU University for any possible sources of stagnant clean water, water logging which can lead to the breeding of Aedes Mosquitoes which spread the vector borne diseases at least 10 Sunday.

## FIT INDIA PLOGGING RUN 2019

On the occasion of 150th Birth Anniversary of Mahatma Gandhi and Fit India campaign NSS, A plogging run was organised on 1 Oct 2019 in our university. All the NSS volunteers were the part of this event. The event started with some words about the plogging run initiated by our Prime Minister, Mr. Nandera Modi. And followed by the felicitation of the Chief guest, Dr.Divender K. Singla by Honourable Vice Chancellor, Prof. R.K. Goyal and Registrar, Dr. Harvinder Popli. Thereafter, students were espoused by Dr. R.K. Goyal where he acquainted them with the objectives and goal of the plogging run and reflected his profound knowledge on the topic to use plastic as less as possible and highlighted the bad effects of it for the environment.

The run was then started from the Auditorium to the Canteen and moved behind DPSRU building and including the Hostel area and ended to auditorium. Students picked up plastics with their hands covered by gloves and put it in the bags where Mr.Rajeshkumar also helped and motivated students. Students committed themselves completely to bring about change in the situation.

to very extend.

Students marked their attendance after completing the run. There was an atmosphere of learning and attempt to make change. Everybody received refreshments at the end nearly at 11:30 AM. This event changed students mind and motivated them

**Clean India Rally:** “Cleanliness is next to Godliness.”

It is the mantra of Mahatma Gandhi, Father of Nation. He demonstrated, propagated and insisted for individual and community cleanliness throughout his life. “A clean India would be the best tribute India could pay to Mahatma Gandhi on his 150 birth anniversary in 2019,” said Shri Narendra Modiji as he launched the Swachh Bharat Mission. It is everybody’s responsibility and one should keep themselves and their surroundings clean and hygienic. It also brings good and positive thoughts in the mind which slows down the occurrence of diseases. Community health department, St. Stephen Hospital have organised a rally to bring awareness to keep surrounding clean among community people residing in Sundar Nagri on 21.10.2021, in association with Nehru Yuva Kendra-Shahdara, Govt. of India, and D.C. Office-Shahdara, Govt. of Delhi. 10 women volunteers from the community, 5 students of Masters of Public Health from DPSRU, actively participated in the rally along with volunteers from Yuva Kendra and Delhi Civil Defence.

Virtual audio rally was also played using smile foundation vehicle. We collected single use plastic items from the streets. Mass awareness created using various slogans: “dharti maa karepukar ,aaspaas ka karo sudhar” ,”gali me na maidan me kudakudedaan me” , “ swachhta ko apnanahai corona door bhaganahai”, “ janjantak ye sandeshpahunchana h hameswachhtakoapnanahai... etc. We hope that our initiative will generate awareness about the long-term harm of using non-biodegradable plastics and motivate the citizens to keep our environment clean.

On the occasion of World Environment Day during the Lockdown period NSS DPSRU came up with an online event to enlighten the students with the importance of environment and nature. The students submitted their short video clips and pictures with plants nurturing them endorsing the role of a friend they play in our lives.
